1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 28-30 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 93/08322. WO 93/08322 discloses a high strength material made by a method of arranging a plurality of filaments, applying molten polymer particles having a size of 10-250 mesh, (10 mesh corresponds to 2mm), in an amount of 0.25-10 parts by weight binder per 100 parts by weight mat, which would appear to meet the claimed limitation that the final volume ration of matrix to the plurality of filament in the composite is approximately 0,4 or less, wherein the applied polymeric binder particles bond at least to fibers in a fixed relationship. See pages 5-7 as well as claim 1. The particles can be applied by spraying. The spray acts to compress the web of fibers, (see example 1, page 10). WO '322 teaches that rovings may be used to make up the mat. It is noted that in the field of composite materials, a roving indicates an array of parallel strands. (see attached textile glossary definition). WO '322 does not disclose the claimed SEAT value, however, WO '322 appears to have the identical structure and therefore it is reasonable to presume that it would have the same SEAT value.
3. Applicant's arguments filed 7/27/05 have been fully considered but they are not persuasive. Applicant argues that WO '322 does not disclose parallel fibers. However, as set forth above, WO '322 teaches employing rovings and therefore does teach parallel fibers.
4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1771

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
